### CHAPTER III

### **METHODOLOGY**

This chapter presents the research paradigm and approach utilized in this study by discussing the methodology and the context in which the study took place. This chapter begins with a discussion of research design, elaboration of the students' current education setting as well as the current field setting, justification for the participants' selection, restatement of the research questions, and discussion of data collection methods, and elaboration of data analysis relative to the instruments used.

## 3.1. Research Design

This study uses qualitative research where the content analysis method is used to collect research results. The qualitative method treats participants really like a subject not an object. Qualitative methods seek to understand and interpret the meaning of an event of human behavior interaction in a particular situation according to the researchers' own perspective. This research aims to identify, and understand the challenges what students feel in the percentage table, its frequency. At the end of the study, students would ask to make reflections to understand the source of the mistakes they made.

## 3.2 Setting and Context

This research was conducted in the translation class in the fifth semester which includes A and B classes of the Department of English Education IAIN Kendari. The reason for choosing this arrangement is based on the initial research conducted by the researcher, the researcher found that one of the lecturers, especially in the translation class, applied the PBL method in his class. In translation class students are taught about several stages in translating, such as Word for word translation, literal translation free translation, faithful idiomatic translation, and semantic communicative translation. In this translation class, lecturers often use PowerPoint while teaching which displays learning material. The tasks that are often given by lecturers when in class are translating novels and projects given by lecturers, such as; search for regional stories on the Internet and translate them into English. After that, students also have to draw and design the storybook as attractive as possible. This project is an assignment given to students in the form of small groups to work within a certain period of time to complete a task based on their experience and abilities.

## 3.3 Participants

The participants of this study were students majoring in English at IAIN Kendari which consisted of 20 V semester students of the 2019/2020 academic year who were involved in Translation including classes A and B. They were between 21 and 22 years old. In determining the participants, first conduct a small study to find criteria that are in accordance with this study. Purposive sample is a non-probability sample selected based on population characteristics and research

objectives. Purposive sampling was used to determine the usefulness in this study because not all fifth semester participants had criteria that matched the phenomenon with this study. Therefore, the researcher chose a purposive sampling technique that stipulates certain things that must be met by the participants used in this study. In this study, the participants were students who met the criteria. The criteria used in this study are firstly the activeness of students in learning Translation and students must be involved in the Translation project. Second, the student is late in submitting the translation project assignment and third, the student who gets the highest score.

#### 3.4 Instrument

According to Sekaran (2000), the quality of research data depends on the quality of the instruments and the quality of the data collection techniques (Isti, 2010). Therefore, in this study the researchersusing instruments, such as reflections.

### a. Reflection

Researchers use reflection to obtain data because journaling or reflective learning is considered one of the most commonly used strategies because of its practical use. The use of reflection also aims to obtain more accurate information about the challenges students feel when working on translation projects in class.

In this study reflection includes analysis of the broader context of experience and action, meaning and sense, and is also used as a research strategy to collect data. According to Moon, reflective writing can be done for several reasons, such as: theory development and adjustment in practical studies,

preparation of action plans, solution of ambiguity and search for alternatives, evaluation of personal progress, etc.

There are fourth questions for reflection and can be seen (appendix). Focus on reflecting on what challenges students experienced in the Translation project by noting what was going on in it, what they were feeling, and what they were thinking.

### 3.4 Data collection

Reflection on student roots once after carrying out the Translation class and after students have scored on their project. Student reflections are shared online via the Google form. Then, the researcher sent an email containing a reflection link to access it and a researcher's review of the research objectives for each participant. In answering this reflection, students are asked to use Indonesian, not English. This is so that the flow of their thoughts is not hindered by language difficulties. In addition, researchers gave participants one week to answer reflections and convey them. This is because writing can take a long time for students. So one way to show that this writing is valuable is to give students time to write.

## 3.5 Data analysis

The data were analyzed by reference to the procedures of sequential explanatory strategy by Creswel (2009). First, the data obtained both from reflections and were tabulated on Microsoft Excel. Second, the data were classified based on several themes based on the research questions about EFL

students' challenges in translation project-based task. Third, the researchers coded, reviewed, analyzed, and integrated the emerging themes as reflected by the 20 participants that led to the final results of data analysis and further used them as a basis of the conclusion drawn. The most relevant excerpts as the empirical answers to the research questions in this study were presented in the result section.

# 3.6 Example of coding and categorization

Q1: From the three stages in the process of making a Translation project, namely, looking for folk stories, determining the design of pictures and story book covers, and translating regional stories into English. Explain what stage in your opinion is the most challenging of your abilities when working on a Translation project!

NO			Q1	Difine	Design	
	Participant			story	picture and	Translati
					cover	ng
1	<b>P1</b>		In my opinion, the most	1	1 //	
			challenging thing is to		m /	
			determine the design of the	THE THE OF ST.		
			image because it must be	RI		
			adapted to the			
			circumstances in folklore			
			and we have to find the			
			appropriate character			
2	P2		Deciding on the design and		1	
			drawing, because I don't			
			have the artistic talent for			
			drawing, that's why I feel			
			arawing, mars will 1001			

		it's a big challenge for me
3	P3	The stage of determining 1
		the most difficult image
		design. Because none of us
		are good at drawing
		illustrations, let alone
		illustrations about folklore
		in the past
4	P4	From the three stages we 1
		did, the stage of translating
		regional stories into
		English was the stage that
		challenged my ability the
		most. me and my group
		must be able to translate
		the local language into
		English properly and
		correctly according to the
		translation rules that we
		have learned in the
		translation class
5	P5	Determining the design of 1
		the image, analyzing the
		story and converting it into
		the form of an image is a
		difficult stage, especially
		for drawing I have no skills
		at all

**P6** In my opinion the most 1 6 challenging is in determining the cover bevcause the cover that is made must be accordance with the story that we raise in the project. So in determining the cover, we must also be careful so that the results match what we are facing Of the three stages in the **P7** process of making the translation project, in my opinion the most challenging stage translating regional stories English because into maybe my Indonesian is not good, moreover, I don't know any regional languages, so that's what made it the most difficult for me to learn. translating regional stories English. but with a group of friends who can help it would be resolved in a timely manner. Total 2 5

Q2 : What are the difficulties you feel when working collaboratively (work in groups) in completing your project assignments? Explain!

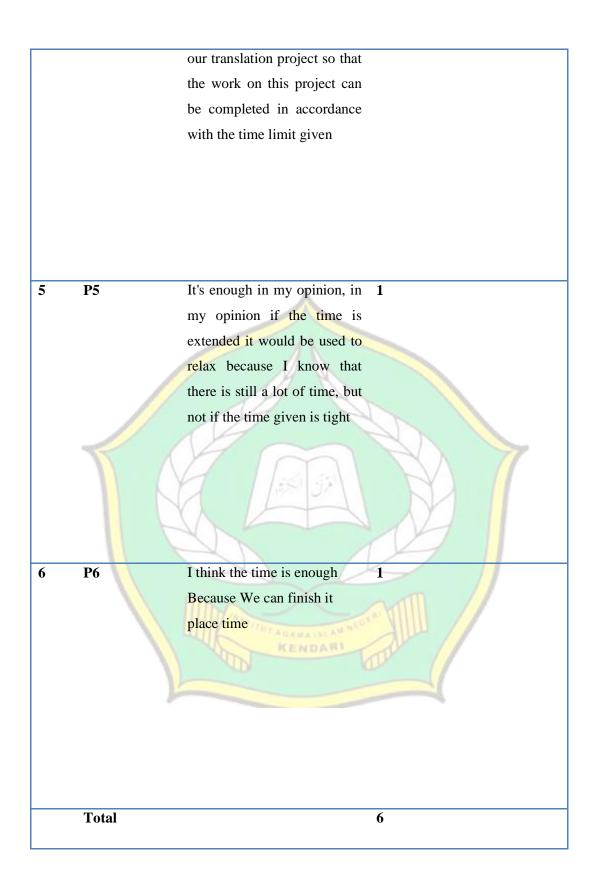

N Particip	Q2	Different	Its	No one	Nothing
o ant		opinion and	difficult	good at	difficult
		lack of	to get	drawing	ies
		communicatio	togethe		
		n	r		
1 P1	The difficulty I			1	
	experienced was				
	when I finished the				
	folklore drawings.				
	In our group there	7			
	are no group				
	members who have		A		77
1	drawing skills so	//30 35 \		$\vee$	
	we have to ask			V	
	other people for			-

			AUTH		
2 P2	The difficulty I face	UT AGAMAIST AM HE	Sea. 1	1/	
	when I'm in a group	KENDARI			
	is drawing, that's			1/	
	why I prefer to				
	write stories or				
	color instead of				
	drawing				
2.75					
3 P3	Our difficulty			1	
	together is only in				
	the difficult				

problem of drawing the characters in the story. After that nothing 4 P4 the first difficulty is 1 the difficulty of determining the story to be chosen, second the determining design of the image that would displayed in the story. I got these two / difficulties because it was difficult for me to determine design of the story and me and my were group confused which folklore we would use. 5 P5 I think everything is not that difficult, some are difficult but not too much because my group is very good at working on this

	project
P6	The difficulty that I 1
	get is that
	sometimes there are
	friends who are
	difficult to contact
	because they are
	busy and it is
	difficult to get
	together because
	the location is far
	apart
P7	The difficulties I 1
	feel when I work
	collaboratively are
	when I call
	together, the reason
	is usually because
	the house is far
	AGAMAISTAM
	vehicle to go to
	campus.
	<b>Total</b> 2 4 1

 $\mbox{Q3}$  : Is the time given by your lecturer to complete the project is enough or not? Explain !

No	Participant	Q3	enough	Not enough
2	P2	Enough because the time given is quite long, besides that the lecturer also opens a consultation session so that we can complete the project on time  It's enough because the duration is long because the duration is more than a week if I'm not mistaken I forgot With that much time we are given the opportunity to prepare the ingredients carefully		
3	P3	Have enough	1	
4	P4	the time given by our lecturer was enough for me and my group of friends to complete	1	

Q4: Briefly describe how you faced the difficulties and challenges you felt while working on this project

No	Participant	Q4	Discussion	Divide a task	Ask for help to others
1	P1	The way we deal with	1		
		difficulties is by			
		discussing with group			
		friends and finding the			
		right solution like			
		when drawing			
		characters in story			
		books			
			0		
			H		
			1		
2	P2	The trick is to do what	J? \ \		
		I can do If it's		17/	
		difficult, I don't force			
		it because the			
		difficulty really comes		m /	
		from creativity	THE RECENT OF		
		KENI			
	,	The state of the s			
3	P3	We discussed how to	1		
		get the pictures in the			
		story finished. And			
		there's someone we			
		can turn to for help.			
		However, in fact, he			
		canceled to help, in			

the end one of us made a makeshift drawing. **P4** first 1 the way is, maintaining good communication with group friends, every challenge faced in this project be can overcome by good communication between fellow group members The difficulty I felt 5 **P5** 1 when this project was in the making of the image design, coloring and translating it into English. Because many new words are not known and making sentences is a little difficult, but

thanks to my group
they are very smart in
this project. Coloring
is also a little difficult
because combining
the right colors to
make it look good is a
bit complicated,
fortunately there was
another group of
friends who taught my
group so everything
could run smoothly
until the project was
finished.

6 P6

My way of dealing 1
with difficulties and
challenges is by
always
communicating with
my group members so
that whenever there is
a problem we solve it
together
